

Construction Design and Management Regulations 2015 (CDM 2015)

2 day workshop

This intensive 2-day workshop is aimed at construction professionals, clients, principal contractors, contractors, converting CDM coordinators, designers and others who need a thorough understanding and working knowledge of CDM 2015.

The course is suitable for organisations and individuals involved in all types of construction work and aims to provide a working knowledge and application of the new role of Principal Designer.

Course content

On completing the course you will:

- Have an understanding of your legal position with regard to CDM2015
- Identify the roles of the principal designer, designer, client, principal contractor and contractor
- Recognise the importance of the requirements for assessment of knowledge, skills, experience and resources in the appointment of duty holders
- Demonstrate knowledge of the application of the 'Principles of prevention' to eliminate, reduce and control risks
- Identify the requirements for project documentation
- Identify the requirements for the provision of information

Course structure

Day One

- Why H&S is so important
